KOMMENTARE DES MAKLERS

The Floating dock is a unique concept originated from the need to store and haul out vessels in remote areas. She can also be used in areas where a fixed Jetty or dockside mooring is not possible or in waters with strong currents. The Floating dock can be towed to any location and then form a secure mooring for any yacht that fits her size. Her 4 Spud poles anchor her secure to the bottom and ensure she will not move. The Floating dock can also be equipped with a light weight roof construction to form an indoor water garage for your yacht. The Floating dock has a lifting capacity of 60 tons.
