## KOMMENTARE DES MAKLERS

B30 is pure sailing pleasure. Conceived for sailing enthusiasts, she can be sailed single-handedly. The B30 is a perfect combination of elegance and performance. Unlike the B38, all manoeuvres are manual and with the assistance of a self tacking jib, sail handling is pretty easy. The narrow hull, the high weight stability and the low freeboards are somewhat reminiscent of the early twentieth century aesthetic taste, but reinterpreted with contemporary technological standards. The boat is built in carbon fiber over a sandwich core, using epoxy resin. Thank to the low wetted surface with respect to sail area, the huge ballast ratio (more than 60% of the weight is in the keel) and the deep attention and appendages designed to minimize drag, the feelings you experience on board are similar to those of a bigger boat. In other words, she is a "small great boat". B30 is pure comfort. Comfort both for the sailor and his/her guest is guaranteed by a very generous cockpit arrangement, carved out of a deck in teak wood, with comfortable and attractive seats to allow you to simply enjoy the action and have fun, Harken winches, incl. trailer.

*Sander van der Voorn*
