**SLOCUM 43
CUTTER**

The experience and resources of the sea had for centuries driven men out upon its waters, nurturing both physical prowess offered from the chance to experience gentle breezes and calm waters sailing before the eye of modern technology. Now, as man's knowledge of the ocean has increased, so too has his dependence upon it. The world's major shipping lanes have reached a new level in his efforts to conquer the sea, while maintaining optimum safety and control.
