## KOMMENTARE DES MAKLERS

This unique aluminium sailing yacht was designed by Sparkman & Stephens, built by the renowned Royal Huisman shipyard and her interior was designed by Pieter Beeldsnijder. EBB TIDE is very easy to sail & handle with 2 persons, but it is also a lot of fun & even easier with a larger crew. The present owner upgraded & maintained her very good since more than 15 years. At this moment hull, deck & superstructure are being painted. EBB TIDE is now looking for a new owner, who wants to take this quite fast yacht out for new adventures. Contact us for an appointment in Italy.

## Weitere Info

EBB TIDE is one of the few famous ocean cruiser-racing yachts, based on the popular concept of the smaller Nautic Swan 65. She is a timeless and very well built and well-maintained yacht with an elegant and well thought out luxury interior that breathes a pleasant sailing atmosphere. It is a great yacht to sail in comfort around the world. Logic set-up sailplan for shorthanded sailing and cockpit push button control. The aft cockpit is a perfect open air observation & steering station area, offering superb 360 degrees visibility, well sheltered separate steering & being also a separate private owners cockpit when at anchor. There has been an Italian captain on the boat in the last 12 years.

## Weitere Info

Additional information Fisher Panda 30/4HD PMS 25 kW generator; Installed in a stainless steel sound shield box, driven by a new engine (new in 2024). GRP Whisper type exhaust with waterlock & water/exhaust gas separator. Consumption approx. 4 l/hr. Start & stop controls at engine room & corridor. Automatic stop when cooling water/oil/overload alarm. Additional information Fisher Panda 12000 NE PMS Compact Power 9 kW generator; Installed in a GRP sound shield box, driven by 4 cylinder diesel. GRP Whisper type exhaust with waterlock & water/exhaust gas separator. Consumption approx. 2 l/hr. Start & stop controls at steering station & engine room & corridor. Automatic stop when cooling water/oil/overload alarm. Generator engine last serviced in 2023. One generator running for approx. 8 hours is sufficient for approx. 24 of electric power in anchor or sail mode (excluding airco).

## Weitere Info

6 Cylinder engine with Turbo charging. Separate (environment friendly) bilge under the main engine. Separate external oil cooler includes, gearbox hydraulic oil. The Twin Disk gearbox is installed with separate oil cooling heat exchangers and flexible couplings. Trolling valve system for manoeuvring at extra reduced propeller speed. V-drive prop shaft set-up. Twin Racor, Separ type fuel filters between the main tank and day tank, main engine and between day tank and main engine. 1 x Racor fuel filter for the generators and the heating system. Fuel transfer system manual/electric with manifold between main tank and day tank. The engine room is isolated with aluminium sheeting down to the waterline. Rubber-lead-lined sound isolation between the engine room and accommodation walls. Where required, the installations in the engine room have been installed on rubber mounts. Provisions are made in the yacht's construction to lift the entire main engine and generator outside through a soft patch in the centre cockpit. The engine room is equipped with a heavy duty mechanical ventilation system. Under pressure vent system to avoid smell in the accommodation. The engine start & stop controls, acoustic engine alarms, exhaust temperature meters and analogue/digital meters at both the steering station in the aft cockpit as in the engine room. 220 Volt TL-lamps & 24 Volt LED light in the engine room. The bow thruster is hydraulic/electric/360 degrees. Controlled in steering cockpit with joystick. Hydraulically driven by PTO from the main engine. Bow thruster has a separate hydraulic oil tank. Professional electrical installation by Huisman & refit (2010/2011) by Yacht Electronic Hamburg Holland. Many electrical parts within system renewed in 2010/2011. Separate main panels, switchboards for 12/24 Volt & 220/380 Volt, including automatic fuse-breaker switches, in the engine room and fuse-breaker switches, control panel in corridor near the navigation station. Several Voltage/Ampere meters and low voltage alarm. Charge/discharge meters. Several 24 & 220 Volt sockets. Manual supply take over.
