## BROKER'S COMMENTS

"A unique opportunity to buy a well maintained classic Chris Craft with almost new engines, newly laid teak deck, new chrome on all chrome details. New fridge and more. Blastered and 4 layers epoxy + 2 layers antifouling 2024. Hull measured 3-4 mm steel."

*Per Engdahl*

YACHT BROKERS

**FIRST BRILLIANT NEW ROAMERS FOR '57**

The beauty and Roamer 20, 24 and 28, is the only series of yachts with a 20-hp outboard motor. The 20-hp outboard motor, with its built-in fuel tank, is mounted on the transom of the yacht, and is the only outboard motor of its kind in the world. It is the only outboard motor of its kind in the world. It is the only outboard motor of its kind in the world.

The large 20-hp outboard motor, (20-hp), is completely enclosed in a steel hull and is a great feature. The hull is made of steel and is completely finished and is 100% finished. It is made of steel and is completely finished and is 100% finished. It is made of steel and is completely finished and is 100% finished.

**ADVANCED ROAMER ENGINEERING BRINGS**

**DE VALK**  
YACHT BROKERS

**SAFETY FIRST**—No matter what the weather, or how rough the sea, you enjoy full confidence in Roamer's rigid steel hull. This water-tight, electrically welded unit of finest hi-strength special alloy steel is your protection against leaks and severe damage from impact—your assurance of safer, smoother sailing.

**SWIMS LIKE A FISH**—In even the roughest going, your Roamer handles with ease. Its low center of gravity lets you ride lower in the water and knife through waves with a minimum of tossing. Roamer's steel hull gives you extra speed, too. Its Gull Flare design insures superb performance in ordinary weather and unusual stability and smoothness in rough seas.

**BUILT FOR A LIFETIME**—The Roamer hull is made of double-strength alloy steel—twice as strong as ordinary steel, and four times more corrosion-resistant than carbon steel. This rugged, heavy-gauge steel plate is welded to steel ribs, giving you a structural combination of tremendous strength.

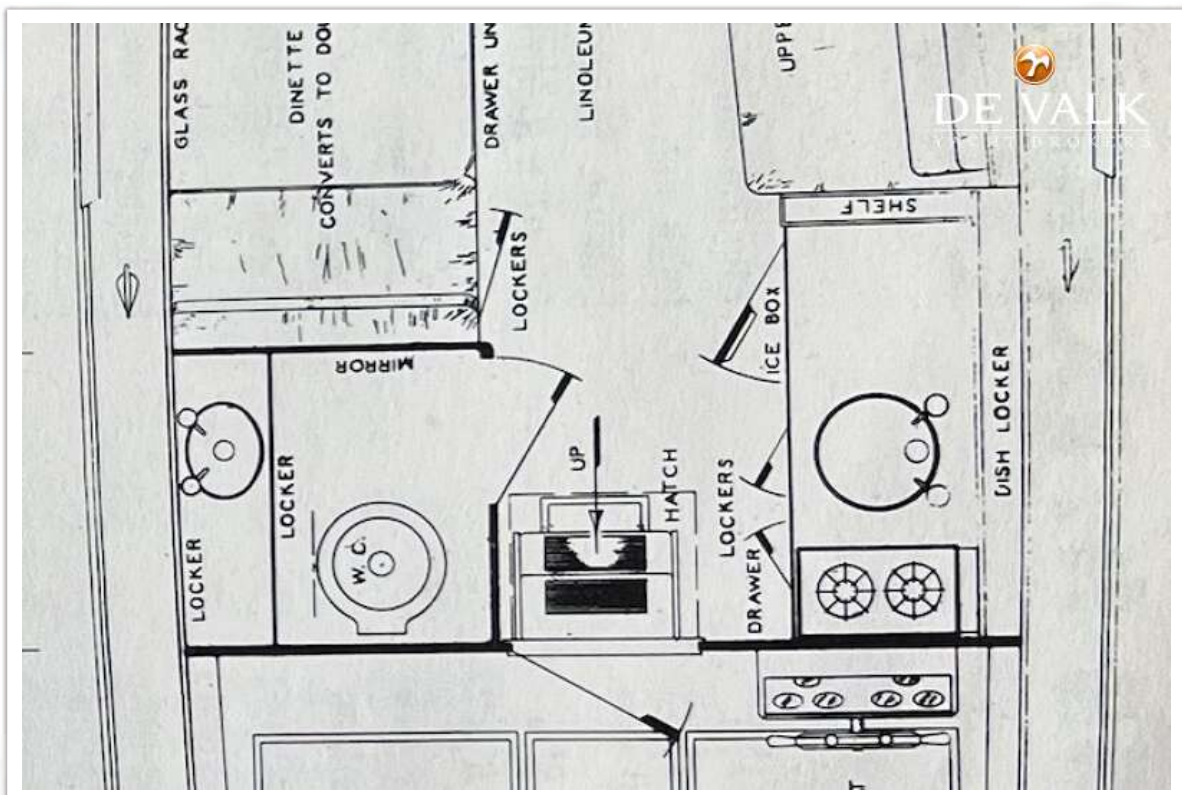

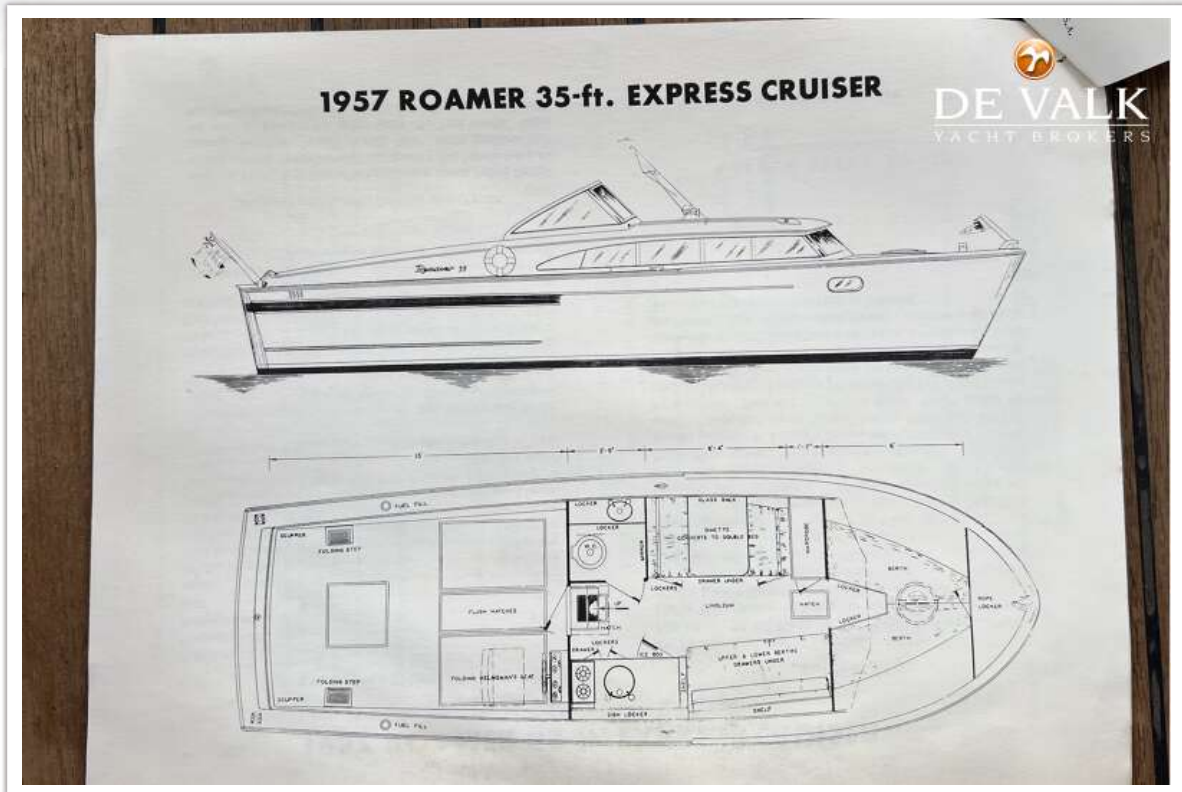

**REDUCES MAINTENANCE BUDGET**—A once-a-year coat of paint is usually all the Roamer hull needs to be kept in top condition. Its exterior is fully protected against rust and corrosion by multiple applications of Roamer's exclusive Chemtite coating. A special Bitumastic compound on the inside permanently seals the dry, water-tight bilge and prevents sweating.

**SILENCE THAT'S GOLDEN**—Every inch of the Roamer's hull interior is insulated to deaden sound and vibration, assuring smooth, quiet running. An air-tight bulkhead, separating engine compartment from cabin, minimizes operating noises in the cabin. And Roamer's engines are rubber-mounted for quiet, vibration-free performance.
