FIRST BRILLIANT NEW ROAMERS FOR '57

▲ The newly-arrived Roamer 25 (shown above) is the latest addition to the Roamer line of motor yachts. From the tip of its hull to the top of its cabin, the Roamer 25 is built with steel, and is completely welded, with no rivets or bolts. The hull is built with a special alloy steel, which is stronger than ordinary steel, and is completely welded, with no rivets or bolts. The hull is built with a special alloy steel, which is stronger than ordinary steel, and is completely welded, with no rivets or bolts.

◆ The larger Roamer 35 (shown above) is completely welded, with no rivets or bolts. The hull is built with a special alloy steel, which is stronger than ordinary steel, and is completely welded, with no rivets or bolts. The hull is built with a special alloy steel, which is stronger than ordinary steel, and is completely welded, with no rivets or bolts.

ADVANCED ROAMER ENGINEERING BRINGS

YACHT BROKERS**

YOU CAN DEPEND ON STEEL

SAFETY FIRST - No matter what the weather, or how rough the sea, you enjoy full confidence in Roamer's rigid steel hull. This water-tight, electrically welded unit of finest hi-tensile special alloy steel is your protection against leaks and severe damage from impact - your assurance of safer, smoother sailing.

SWIMS LIKE A FISH - In even the roughest going, your Roamer handles with ease. Its low center of gravity lets you ride lower in the water and knife through waves with a minimum of tossing. Roamer's steel hull gives you extra speed, too. Its Hull-Flex design insures superb performance in ordinary weather and unusual stability and smoothness in rough seas.

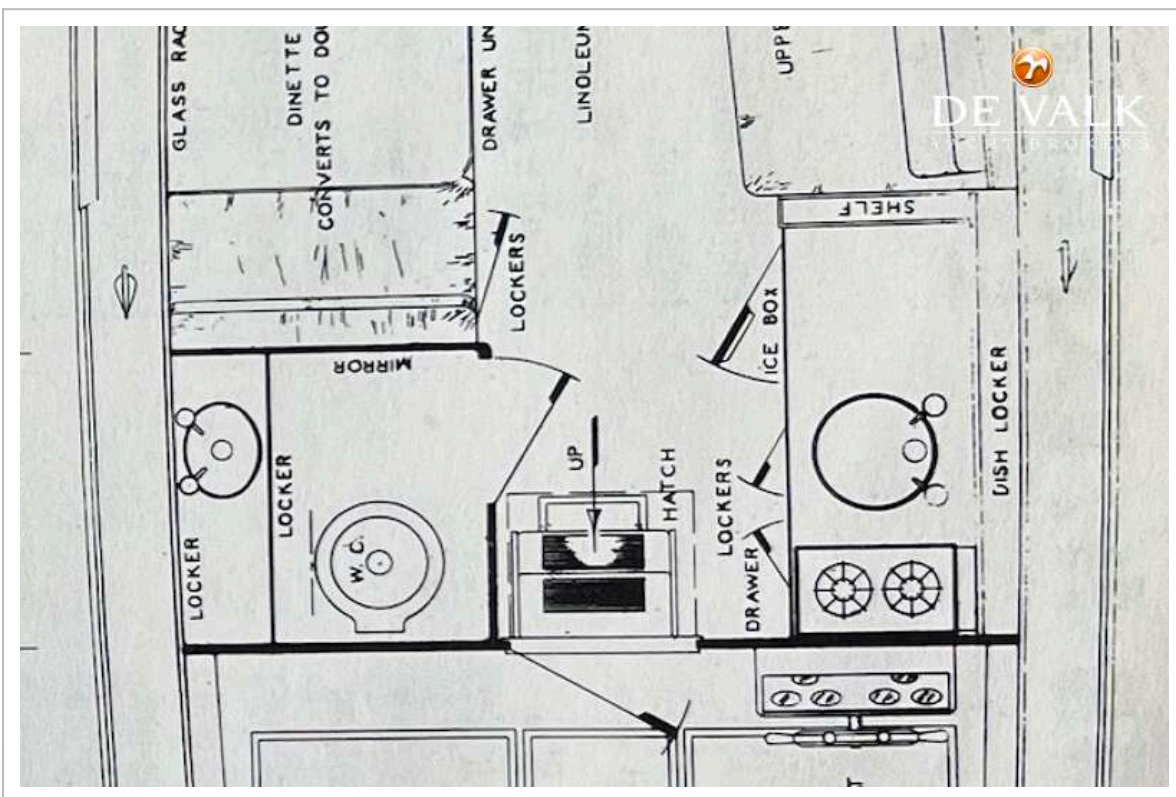

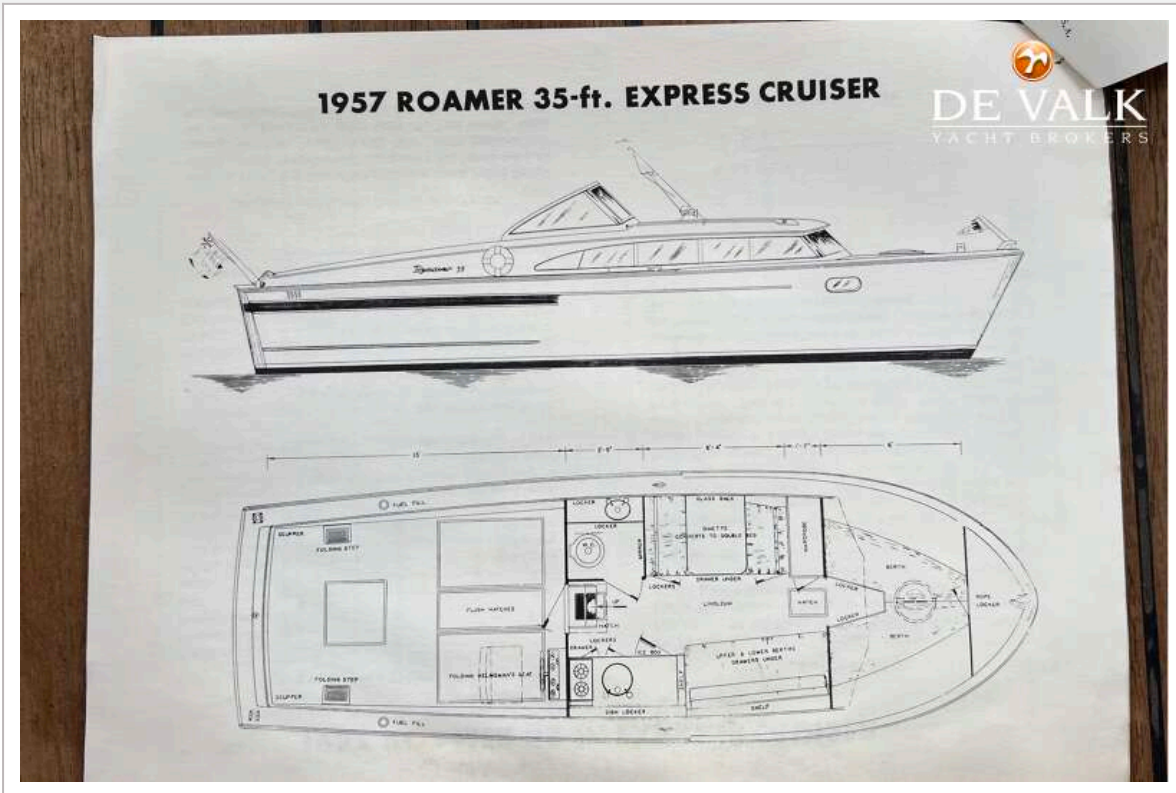

BUILT FOR A LIFETIME - The Roamer hull is made of double strength alloy steel - twice as strong as ordinary steel, and four times more corrosion-resistant than carbon steel. This rugged, heavy gauge steel plate is welded to steel ribs, giving you a structural combination of tremendous strength.

REDUCES MAINTENANCE BUDGET - A once-a-year coat of paint is usually all the Roamer hull needs to be kept in top condition. Its exterior is fully protected against rust and corrosion by multiple applications of Roamer's exclusive Chemtastic coating. A special Bitumastic compound on the inside permanently seals the dry, water-tight bilge and prevents sweating.

SILENCE THAT'S GOLDEN - Every inch of the Roamer's hull interior is insulated to deaden sound and vibration, assuring smooth, quiet running. An air-tight bulkhead, separating engine compartment from cabin, minimizes operating noises in the cabin. And Roamer's engines are rubber mounted for quiet, vibration-free performance.
