BARKAS SUPERSPORT 900 SSH-HYBRID

BROKER'S COMMENTS

"The Barkas is a beautiful sight as she sails by. The ship is built of polyester and finished with wood. Wood such as teak and mahogany has been used for this, which gives a quality appearance. The boat has been modified and has a new underwater hull, so the boat has very good sailing characteristics at speeds of 20 to 25 knots. For lower cruising speeds the Barkas is equipped with a very powerful electric motor. The motor provides a quiet and comfortable ride."

Mark Hesselmans
