KOMPIER STAHLMOTORYACHT

BROKER'S COMMENTS

The Kompier steel motor yacht was built in 1975. In 1990 the motor yacht was extensively refitted by the current owner. The hull was sandblasted and coated with tar epoxy. The hull was painted white with two-component paint. The newly installed wheelhouse was built with 6mm aluminum. The deck is made of 4mm steel with a non-slip coating. Due to its construction, size, motorization and bunker capacity, the yacht can be used on the open sea, even far away from the coast.
