The luxury Caribe tender, equipped with a 30 hp four-stroke engine with only 100 cruising hours can be used to take guests ashore, but is also suitable for water sports activities. The 55-kg Rocna anchor, purchased in 2022 combined with the 100-metre 12-mm anchor chain keeps the vessel safely in place in all weather conditions. The length of the chain also allows the vessel to anchor away from the crowd.

Extra info	Thanks to the solar panels, the vessel is almost self-sufficient. Once a week 1800 litres of water and connect to shore power for re-charging the batteries. The ship has six service batteries and two starter batteries (new in 2022) of 230 ah. The entire electrical system is a powerful 28 volts and Victron's 3000-watt inverter/battery charger/solar charger (new 2023) provides a constant 230 with pure sine wave.
