## BROKER'S COMMENTS

John Kretschmer writing for Sailing Magazine commented, "it's a big boat trapped in a short body" and certainly the displacement and ballast numbers are more akin to boats in the 35ft range. The Baba 30 was the smallest craft in the range but very popular. They were built as sturdy vessels suitable for making long offshore and ocean passages needing only a couple of people to crew the boat. The quality of workmanship is superb and new teak is abundantly used. A true blue water cruiser, capable of world voyaging. Extra Budget II is clean, rugged, well maintained and is a real head-turner.
