Extra info	Myson Kickspace 500 | A compact baseboard heater that is iscreetly fitted, for example under a kitchen cupboard. The unit is connected to the central heating system and uses a built-in fan to blow heat quickly and evenly into a room. This makes it an ideal, space-saving solution for kitchens or small rooms where there is no space for a traditional radiator. Thanks to a smart thermostat, the fan only switches on once the central heating water is warm enough, ensuring that cold air is never blown out.
