

FLOATING DOCK

2020 | 23,01 m | staal

BROKER'S COMMENTS

"The Floating dock is a unique concept originated from the need to store and haul out vessels in remote areas. She can also be used in areas where a fixed Jetty or dockside mooring is not possible or in waters with strong currents. The Floating dock can be towed to any location and then form a secure mooring for any yacht that fits her size. Her 4 Spud poles anchor her secure to the bottom and ensure she will not move. The Floating dock can also be equipped with a light weight roof construction to form an

SPECIFICATIES
